

Kaixuan Li

Cyber Security Research Centre @ NTU (CYSREN)
Nanyang Technological University

Singapore
kaixuan.li@ntu.edu.sg
[kaixuanli-ecnu.github.io](https://github.com/kaixuanli-ecnu)

Research Interests

My research has evolved from **static program analysis** into **automated vulnerability reasoning**, spanning the full vulnerability lifecycle: detection, root-cause analysis, exploitation, repair, and tracking for supply-chain security. I pursue these directions through neuro-symbolic methods that integrate program analysis with large language models.

Employment

Nanyang Technological University **Singapore**
2026 – present Postdoctoral Research Fellow, Cyber Security Research Centre @ NTU (CYSREN)
2025 – 2026 Postdoctoral Research Fellow & Project Lead (Project C6), AUMOVIO-NTU Corporate Lab (formerly Continental-NTU)
2023 – 2024 Research Assistant, Continental-NTU Corporate Lab
2022 – 2023 Visiting Student, Cyber Security Lab, SCSE
East China Normal University **Shanghai, China**
2020 – 2025 Ph.D. Researcher, Software Engineering Institute

Education

East China Normal University **Shanghai, China**
2025 Doctor of Philosophy, Software Engineering
 Thesis: *Multi-Dimensional Analysis and Optimization Methods for Static Application Security Testing* (in Chinese)
 Advisor: Prof. Yixiang Chen
2020 Bachelor of Engineering, Software Engineering
Nanyang Technological University **Singapore**
2022 – 2023 Visiting Ph.D. Student, School of Computer Science and Engineering
 Host: Prof. Yang Liu

Honors and Awards

Research Quality

2026 ACM SIGSOFT Distinguished Paper Award, ACM SIGSOFT Intl. Symposium on Software Testing and Analysis (ISSTA)
2026 Young Outstanding Paper Award, Shanghai Association of Artificial Intelligence (SAAI)
2024 ACM SIGSOFT Distinguished Paper Award, ACM Intl. Conference on the Foundations of Software Engineering (FSE)

Dissertation and Academic Recognition

2026 Doctoral Dissertation Incentive Program, CCF Technical Committee on Software Engineering

2025	Distinguished Ph.D. Thesis, East China Normal University
2025	Distinguished Ph.D. Thesis, College of Information Technology, ECNU
2025	Outstanding Graduate of Shanghai (Postgraduate)
2025	“Outstanding Student Youth” Award, Software Engineering Institute, ECNU
2024	President Scholarship of East China Normal University (≤ 10 recipients per year)
2024	National Scholarship, Ministry of Education, China
2024	“Student Technological Excellence” Award, SEI, ECNU
2020 – 2025	Merit Student of East China Normal University (awarded every academic year)
2020	Outstanding Graduate of Shanghai (Undergraduate)

Travel and Visiting Awards

2023, 2024, 2026	ACM SIGSOFT CAPS Travel Grants (FSE 2023, FSE 2024, ISSTA 2024, FSE 2026)
2022 – 2023	Visiting Ph.D. Student Scholarship, China Scholarship Council

Other

2021	3rd Prize, 18th China Post-Graduate Mathematical Contest in Modelling
2020	3rd Prize, 17th China Post-Graduate Mathematical Contest in Modelling

Publications

Grants and Funded Projects

As Project Lead

- 2025 – 2026 **Hypervisor Cybersecurity Assessment** (Project C6). AUMOVIO-NTU Corporate Lab, Nanyang Technological University. 750K SGD.

As Independent Proposer

- 2026 **Reflective Cyber Reasoning**. Gemini Academic Program Award, Google Cloud. 20K USD.
- 2026 **Z.ai Cyber Security Partnership Program**. Z.ai. Model access and credits for security research.
- 2025 – 2026 **Towards Reliable Reasoning for Large Language Models**. Key Laboratory of Symbolic Computation and Knowledge Engineering of the Ministry of Education. 20K RMB.
- 2023 – 2024 **Compatibility Analysis and Assurance for Open-Source Software**. Huawei. 550K RMB.
- 2020 – 2022 **Innovative Approaches to Task Partitioning and Scheduling in Heterogeneous Embedded Systems**. Dean Fund, MoE Engineering Research Center for Hardware–Software Co-Design. 120K RMB.

As Co-Proposer

- | | |
|-------------|--|
| 2022 – 2023 | Resilient Software Architecture Design and Elegant Downgrading. Huawei. 600K RMB. |
| 2021 – 2022 | Software Trustworthiness Measurement. Huawei. 600K RMB. |

Industrial Impact

Deployed Tools

- | | |
|----------------|--|
| 2024 – present | PatchFinder (cf. [C10]). Deployed internally at Scantist Pte. Ltd., Singapore, for OSS vulnerability patch tracing. |
| 2025 – present | ARASH (cf. [J1], patent [P3], TD5). Deployed at AUMOVIO; partially integrated into Google’s <code>oss-fuzz-gen</code> , used in conjunction with our LogicFuzz framework (TD2). |

Vulnerability Disclosures

- | | |
|-------------|--|
| 2025 – 2026 | LogicFuzz (cf. TD2) discovered and reported 20+ zero-day vulnerabilities in popular open-source C/C++ projects; all confirmed and fixed by upstream maintainers. |
|-------------|--|

Invited Talks and Presentations

- | | |
|-----------|--|
| Sep. 2026 | “Testing Static Analyzers via Semantic-Preserving Mutators Learned from Real-World Refactoring Practice.” CCF Technical Committee on Software Engineering, Young Scholars Forum, Zhejiang University, Hangzhou, China. |
| Jul. 2026 | “Organizing Vulnerability Knowledge for OpenHarmony.” Huawei, Shenzhen, China. |
| May 2026 | “Neuro-Symbolic Vulnerability Detection and Exploitation.” East China Normal University, Shanghai, China. |

- Apr. 2025 “PatchFinder: A Two-Phase Approach to Security Patch Tracing for Disclosed Vulnerabilities in Open-Source Software.” CCF Technical Committee on Formal Methods, Young Scholars Forum.
- Dec. 2024 “Static Application Security Testing (SAST) Tools for Smart Contracts: How Far Are We?” Xi’an Jiaotong University, Xi’an, China.
